

Project Engineer

Competitive Salary Package
Takapuna Based

Do you want to work for a leading New Zealand Mechanical Engineering consultancy that recognizes the importance of work/life balance, in a location where you can take your lunch break walking along Takapuna beach, enjoy the many local cafes or make use of gyms?

Dobbie, an award winning consultancy, has an opportunity for you to further develop in the mechanical engineering field working on a variety of industrial sites across New Zealand in areas such as dairy, geothermal, energy, pulp and paper.

An ideal candidate would possess:

- Bachelor's Degree in mechanical, mechatronics or process engineering with 3+ years relative experience
- Practical approach to design
- Excellent communication skills
- A desire to visit and work in industrial plants and construction sites
- Skills to lead/participate as part of a design or project team
- Project management experience
- Experience with the design of pressure equipment systems, industrial plant installations, pump and control equipment selection
- Ability to work in a team environment, wanting to grow professionally and technically

Naturally you will be a strong team player and with proven communication skills and have the ability to build strong relationships. We are committed to fostering a culture that empowers our people, promotes teamwork and encourages sustainability. If this sounds like you, then we are interested in talking to you.

**Applicants for this position must have NZ residence or a valid NZ work permit.
Please submit your CV to careers@dobbie.co.nz**
